To whom it may concern,

I have impacted teams creatively by finding innovative and constructive solutions to problems and I am the best choice as your designer. I have 6 plus years of background in design and my recent career change got me into UX/UI design.

Currently, I am now enrolled as a student to learn more about backend design. What I bring to the table is unique ideas, designs and new possibilities. I think about the different directions projects can go in and bring out the best in a project. In the past, I have also volunteered my services to several companies and have worked with many types of designers across the board to complete these projects.

I love learning about new systems and applying it to my projects. I am moldable as well as a self driven type of designer. I also understand the value in time management and clear communication. I'm great at working in teams to get a project done right.

I look forward to discussing my traits and capabilities with you. Please don't hesitate to reach out if you have any further questions about my background. Thank you for your time and consideration and I look forward to hearing from you.

Sincerely,

Mackenzie Evangelista
